

Dear Hiring Manager,

I am excited to apply for the Web Developer position at Oracle. I have recently completed my Bachelor of Computer Applications and bring hands-on experience in web development with a strong foundation in PHP, MySQL, and JavaScript.

During my role at MakeStudy, I developed and maintained web applications, including authentication systems, dashboards, and CRUD modules. One of my key achievements was building an OCR-based Passport Auto-Fill system using Tesseract and AWS, which improved efficiency and demonstrated my ability to work on real-world automation solutions.

I have also worked on multiple projects such as an AI-based Caption Generator and responsive websites, which strengthened my frontend and backend skills. Currently, I am enhancing my expertise by learning Python and exploring AI-driven development.

I am highly motivated to begin my professional journey with Oracle, where I can contribute my skills, learn from industry experts, and grow as a software developer.

Thank you for your time and consideration.

Sincerely,
Kajal Rajput
